

## PROCLAIMING THE DEFEAT OF MALARIA

### BREAKTHROUGH

African Restoration has initiated demonstration farms in Africa to grow a simple herb that cures Malaria and provides a practical preventive. From bases in Uganda, Tanzania and Kenya this agricultural and medicinal know how is to be quickly shared with other Sub-Saharan countries. This humanitarian breakthrough will provide a low cost, self sustainable remedy for 300 million Africans who are acutely ill with Malaria virtually eliminating the death toll of 3,000 children each day!

### THE HERBAL CURE

With overwhelming proof that "Wormwood" cures Malaria, African Restoration boldly challenges the status quo that watches millions suffer needlessly. Wormwood has been successfully used in China for many centuries, with documentation on its use going back 1,600 years. It is now known that the Communist troops in Vietnam drank the wormwood tea to give them protection against Malaria that the American troops did not have. It has been used so successfully, that in many regions of Asia, Malaria is no longer a threat. The "pharmcuetical pills", that have exorditant costs (money & lives) to develop and distribute, is made from artemisia, an extract of Wormwood.

### FREE TO THE POOR

The herbal tea is to be distributed free to poor through faith based organizations in a ministry alliance. Offering it as a free food bypasses much of the politics, greed and corruption has been all too common. This is the only real hope for the poor, creating the greatest opportunity for healing / evangelism in the history of the world. 500 million Africans are expected to be brought into the Kingdom and nurtured in a sustained ministry.

### BIRTHED IN MAASAI LAND

African Restoration was birthed in the bush country of Kenya by a Missionary to the Maasai Tribe; his story is told through experience, revelation and specific application in the new book "Shout GLORY". A free preview is available online in a PDF format. The proceeds from this book will help establish the self sustainable demonstration farms that grow the herbal cure.
